When instructed to do so, please answer the following questions as best you can. Hand in this worksheet at the end of class. Don’t forget to put your name at the top!

1. Write a method `printfunny` that takes as parameter a string `s` and prints out each character of `s` separated by commas, all surrounded by square brackets. For example, if `s = "trogdor"` then `printfunny( s )` prints `[t, r, o, g, d, o, r].`
