Program PayPeriods defines 3 employee classes:

Salaried workers have an annual salary. Every fourth week (i.e., once a month) they are paid 1/12 of their annual salary.

Hourly workers have an hourly wage. Every week they are paid for 40 hours of work.

Robots aren't paid at all. We keep count of how many robots there are. If there are currently 3 robots, the next one is named "Robot3."
