Announcements for March 30

- Lab 07 is due at 6PM on WEDNESDAY, April 1.
- In Lab 08 you will need to create and work with classes. We spent the week before Break talking about classes. For more information on classes, see Chapter 10 of the text.
- Lab 08 has relatively short coding exercises, but you need to understand the surrounding material in order to write the code. Spend some time this week reading carefully the prelab and lab documents.
