Announcements for September 15, 2014

- On Wednesday we will start talking about Algorithm Analysis. I would like you to read Sections 4.1-4.3 of the text. If you have seen this before you should be able to read 4.1 and 4.2 quickly, and then 4.3 with a little more care.

- The practice sessions for the programming teams will be on Tuesday evenings at 7:30 in the downstairs computer lab. If you can’t go tomorrow but are interested, let me know and I’ll connect you with the organizers.
