CS 341: Operating Systems   **Classroom Norms**
Spring 2021

- Make sure everyone gets to talk in small group discussions.

- Take turns reporting out from small groups - don't have the same person report back each time.

- If you think someone is wrong, ask them to explain their thinking rather than just dismissing it.

- In group discussion, have everyone state their answer before discussing which answer is correct

  - Take turns with who says their answer first

- Contribute as you feel comfortable

  - If you're not comfortable answering, you can pass.
  - If you're not usually inclined to speak much in class, push yourself to ask questions more often.

- Be aware of the space you take up in class

  - Make space for others, use some space for yourself

- The main goal of every person in the class should be to engage proactively with the ideas we understand the least. If someone asks a question/makes a comment that seems obvious to you, show them respect.

- Be aware of the implications of using Zoom

  - More isolating than discussing in person
  - Students from all over the world, in all different time zones
  - Recorded
